

OEM Chemicals in a National Brand

PRODUCT INFORMATION

Lubricants

Synthetic Spray Lubricant

FEATURES & BENEFITS

Synthetic Spray Lubricant is a superior penetrating lubricant and protectant spray that adheres to surfaces. It provides all the necessary characteristics of penetration, lubrication and protection to all types of metal surfaces, threads and sliders. The synthetic components ensure the product functions in extremes of heat and cold.

DIRECTIONS FOR USE

Shake can very well before using. Apply Synthetic Spray Lubricant to points or surfaces to be penetrated, lubricated and protected. For hard-to-reach areas or to pin-point a spot, use an extension tube.

PRECAUTIONS

REFER TO SAFETY DATA SHEET FOR PRECAUTIONS IN HANDLING.

AVAILABLE PACKAGE SIZES

TNDS8011 330g aerosol

Extreme lubrication requirements call for an extreme product. Excessive heat, cold, moisture and corrosion will attack parts and surfaces, making them inoperable. Once seized, these parts can be difficult or impossible to free up.
