

OEM Chemicals in a National Brand

PRODUCT INFORMATION

Lubricants

Foamy Penetrating Spray

FEATURES & BENEFITS

Foamy Penetrating Spray is a heavy-duty lubricant and penetrant which uses a unique formulation that will penetrate rust, lubricate surfaces and parts that are tight and binding, and repel moisture from surfaces. The foamy nature of the product assists in the product's ability to stick to the surfaces it is sprayed on. Use for automotive, marine, shop and household applications.

DIRECTIONS FOR USE

Spray product directly on the surfaces of the parts requiring loosening or treatment. Allow the product to soak into the surface. Apply appropriate force to loosen sticking or binding parts.

PRECAUTIONS

REFER TO SAFETY DATA SHEET FOR PRECAUTIONS IN HANDLING.

AVAILABLE PACKAGE SIZES

TNDS8047 440g aerosol

Lack of lubricant can cause locks to stick, nuts and bolts to jam and hinges to bind. Lack of lubricating oil will allow moisture to penetrate which promotes rust and corrosion on metal surfaces.
